Also, wanted to call you to find out the status of the briefings I sent. Can you please send me the final versions. I'd like to see your edits to learn and to have them for the future. Thanks,
Johanna.

Don't worry. I don't care if you changed the heck out of them.

Wendy

Did you mean to copy Craig on this as well? I hate to think of him getting messages from someone without at least the benefit of having read this message.

Subject: Revised Request: CISM Deployment to Gold King Min Incident, Durango, CO

Importance: High

Team – Wendy Adams and Tony Honellio deployed to Durango on Saturday, August 15 to provide a first round of CISM support to the response. Tony is scheduled to be in Durango for a 2 week rotation through August 31st. Wendy could only stay one week and will be leaving on Sunday, August 23.

For planning purposes we are gathering information about availability of team members for a one or two week rotation travelling on Saturday, August 22. As soon as possible please let Craig and I know your whether you can fulfill this request – indicate whether you are available for a 1 week or if needed 2 week rotation.

As with all responses, it is a rapidly changing situation but we wanted to get the request out early in the week to provide as much time as possible for you to plan travel. Johanna

Subject: FW: CISM Deployment request to Gold King Mine, Durango, CO

Team – On behalf of Craig, I am sending out a request for availability to deploy as a CISM Team member to the Gold King Mine Incident in Durango, CO. You would be supporting the area command and Region 8 incident command in Durango and would need to be able visit operations locations including some located at 10,000 ft elevation. You need to be current on field safety training (at a minimum the 24 hour on-line field safety training). Please respond back to Craig and I about availability ASAP for:

August 14th or 15th for a 10 day to 14 day rotation

Aug 26th-28th for a 10 to 14 day rotation (the need and dates of a future deployment to be determined by the first team and IC).

Thank you for your support. Johanna Miller

Subject: CISM Deployment request to Gold King Mine, Durango, CO

Request for CISM Presence at the Gold King Mine Site, Durango, CO

Per the request from the Incident Area Commander, David Ostrander, Region VII is requesting the EPA's CISM Team to deploy and provide CISM/PEER Support. The HQ CISM Coordinator and Region's VIII's CISM are currently formulating a CISM Response Team to deploy to the Incident Area Command Center in Durango, CO. The Team will provide CISM for Emergency Responders for stress related health concerns.

The HQ Coordinator will secure a two CISM Team to deploy to Durango, CO. The Deployment is scheduled for two weeks or less. If requested, and second CISM team will be created and deploy to the same location for an additional two weeks or shorter.

All CISM communications coordination will be conducted between the HQ Coordinator and Region VII's CISM Team Lead.

A general summary closeout report will be generated at the end of tour.
